'From Pollution to Solution' is a landmark assessment detailing and analyzing the current state of scientific knowledge on marine litter and plastic pollution.

The event will bring together experts in science and policy to discuss the key findings of the assessment and its relevance in the lead up to the fifth session of the UN Environment Assembly, and beyond.

Global Partnership
on Marine Litter

The launch event aims to:

- Present the key findings of the assessment, as well as the accompanying Vital Graphics report, which is jointly published with the Basel, Rotterdam and Stockholm Conventions (BRS)
- Discuss various aspects of the scientific findings in the assessment, as well as knowledge gaps and emerging issues
- Discuss policy implications of the assessment for governments, industry and intergovernmental organizations, including in the lead up to UNEA 5.2
- Provide an overview of the Global Partnership on Marine Litter (GPML) Action Tracks and activities to advance them
- Introduce the GPML Digital Platform and how it enhances multi-stakeholder engagement and collaboration
- Engage our audience in the panel discussions
